

PASCONX ACADEMY

Cyber Security SOC Analyst (L1)

Master Hands-On Threat Hunting, SIEM & Incident Response

An immersive, lab-first cybersecurity program taking you from core security fundamentals to enterprise-grade defensive operations.

01

50%+ Practical Hands-On
Labs

02

L1 SOC Analyst Job-Ready

03

100% Live Instructor-Led

ABOUT PASCONX

PasconX unites a strong foundational structure, an operational command mindset, and Information eXcellence to deliver transformative learning experiences for tomorrow's cybersecurity leaders.

OUR VISION

To be the premier digital institute that empowers the next generation of global tech leaders by replacing passive theory with immersive, lab-first execution—building a skilled workforce capable of securing and innovating the digital future.

OUR MISSION

To deliver accessible, mentor-led, and career-focused technical education through cutting-edge virtual environments and industry-aligned curricula, taking learners from core fundamentals to job-ready mastery.

LAB-FIRST DELIVERY MODEL

Learning Methodology

Module Topic	Theory	Practical / Labs	Total Hours	Primary Focus & Outcome
1. Windows /Linux Architecture	5 Hrs	5 Hrs	10 Hrs	Event IDs, Sysmon Telemetry, Linux Logs
2. Networking & Wireshark	5 Hrs	5 Hrs	10 Hrs	OSI, TCP/IP, Wireshark PCAP, Nmap Scans
3. Security & SOC Fundamentals	4 Hrs	2 Hrs	6 Hrs	CIA Triad, SOC Workflow, Phishing Analysis
4. Threat Intel & MITRE ATT&CK	3 Hrs	3 Hrs	6 Hrs	Cyber Kill Chain, TTPs, Open Source OSINT
5. SIEM Mastery (Splunk / ELK)	6 Hrs	8 Hrs	14 Hrs	SPL Queries, Correlation Rules, Alerting
6. Incident Response & Triage	4 Hrs	4 Hrs	8 Hrs	NIST Lifecycle, Ticketing, EDR Basics
7. Capstone & Interview Prep	3 HRS	3 Hrs	6 Hrs	Live Breach Simulation & Technical Mocks

Program Overview

Designed specifically for beginners and aspiring security professionals, this intensive 60-hour career track bridges the gap between theoretical security concepts and real-world Security Operations Center (SOC) practices.

01 Balanced Learning

30HoursTheory+30Hours Practical Labs

02 Industry-Standard Tools

Splunk, Wireshark, Sysmon, Nmap

03 Scenario-Based Learning

Real incident investigation workflows

04 Career Centric

Resume building, LinkedIn optimization & mock interviews

Modules 1 & 2

Mod 1: OS Artifacts & Telemetry

- Event IDs
- File paths
- Sysmon
- Windows/Linux logs
- Lab exercises

Mod 2: Networking & Protocols

- OSI model
- TCP/IP
- DNS
- DHCP
- Wireshark deep packet inspection
- Nmap scans
- Labs and topics

Modules 3 & 4

Mod 3: Intro to SOC

CIA Triad
AAA Security Framework
SOC L1/L2/L3 roles
Malware types
Phishing
Labs

Mod 4: Threat Intel & Frameworks

VirusTotal
Cyber Kill Chain
MITRE ATT&CK
IoCs vs. IoAs concepts

AlienVault OTX
AbuseIPDB
Examples and labs

Module 5

SIEM Fundamentals

Splunk & ELK foundations, ingestion, search, alerting, dashboards and correlation rules.

Splunk Search Processing

Search query snippets, field extraction, filtering and investigation workflows.

Practical Attack Detection

8 Hours of Practical Labs
Brute-force attacks
Domain admin additions
Exfiltration
Detection scenarios

Modules 6 & 7

Mod 6: Incident Response

NIST SP 800-61 lifecycle
SQL Injection alert triage
Ticketing
Containment advice
Live breach capstone description

Mod 7: Capstone & Career

Resume and LinkedIn optimization
Mock Technical Interviews (Top 20 SOC questions)
Career coaching details

Hands-On Tools

SPLUNK & ELK

Enterprise SIEM platforms for log correlation, threat hunting, and custom rule development.

WIRESHARK & NMAP

Industry standard packet analyzer and network discovery tools for deep protocol inspection.

SYSMON & EVENT VIEWER

Windows telemetry logging and process auditing tools to spot malicious activity.

Industry Immersion & Startup Internship Track

Pre-Placement Offers (PPOs)

High-performing interns gain direct pathways to full-time junior analyst or pentesting offers

Role Alignment

Internships focus on junior-level responsibilities including L1 alert triage, vulnerability assessments, documentation & compliance auditing

Real-World Portfolio

Exposure to live codebase reviews, cloud attack surfaces & commercial ticketing workflows.

Enterprise Credibility

Eliminates the "zero-experience" barrier when applying for competitive cybersecurity roles.

Career Support

01

Portfolio Development: Internships, exposure to real time project knowledge.

02

1-on-1 Mock Interviews: Rigorous practice covering technical log questions, OSI model, and scenario triaging.

03

LinkedIn & Resume Audit: Tailored keyword optimization for L1 SOC Analyst & Junior Security Operations job postings.

04

Course Certificate issuance details: Verified PasconX SOC Analyst Certificate of Completion
