

PASCONX
ACADEMY

ADVANCED VAPT & ATTACK LIFECYCLE PROGRAM

Comprehensive EthicalHacking,
Network Exploitation and Full
Threat Lifecycle Mastery

ABOUT PASCONX

PasconX unites a strong foundational structure, an operational command mindset, and Information eXcellence to deliver transformative learning experiences for tomorrow's cybersecurity leaders.

OUR VISION

To be the premier digital institute that empowers the next generation of global tech leaders by replacing passive theory with immersive, lab-first execution—building a skilled workforce capable of securing and innovating the digital future.

OUR MISSION

To deliver accessible, mentor-led, and career-focused technical education through cutting-edge virtual environments and industry-aligned curricula, taking learners from core fundamentals to job-ready mastery.

Program Overview

Pasconx VAPT Track is an exclusive program designed to transition defenders into elite penetration testers

- > **Selective Admission:** Open exclusively to Pasconx SOC alumni or working cyber professionals via screening
- > **Full Attack Lifecycle:** Covers network, wireless, endpoint, mobile, and IoT surfaces
- > **Dual-Sided Perspective:** Understand defensive detection mechanisms while validating attack paths
- > **Enterprise Auditing:** CVSS v3.1 scoring, remediation roadmaps & formal reporting

SEVEN MODULES/ONE COMPLETE LIFECYCLE

Curriculum Matrix

60-Hrs BreakDown

1. 5 Stages & Cyber Kill Chain Recon to Track Covering, MITRE ATT&CK, Rules of Engagement & Scoping. 6 hrs	2. Advanced Recon & Enumeration Nmap NSE, SMB/SNMP/LDAP/RPC Enumeration, Attack Surface Profiling. 8 hrs
3. Network Exploitation & Scans Network Layer Flaws, Metasploit Auxiliary/ Exploits, Nessus. 10 hrs	4. Endpoint Security & Evasion Reverse Shell Mechanics, Windows Defender Hardening & Static/Dynamic Analysis. 10 hrs
5. Wireless Network Pentesting WPA2/WPA3 Handshakes, Deauth Captures & Enterprise EAP-TLS Defenses. 8 hrs	6. Mobile & IoT Architectures Android APK SAST (MobSF), Firmware Extraction & IoT Protocol Analysis (Binwalk). 10 hrs
7. Capstone Multi-Target Assessment & Reporting Full Multi-Target Penetration Test, CVSS v3.1 Scoring, Executive Report & Technical Roadmaps. 8 hrs	

MODULES 1 & 2

01 5 STAGES & KILL CHAIN

- **5 Stages of Hacking:** Recon, Scanning, Gaining Access, Maintaining Access, Covering Tracks.
- **Threat Frameworks:** Cyber Kill Chain vs. MITRE ATT&CK Matrix.
- **Scoping & Compliance:** Rules of Engagement (RoE) & legal bounds.
- **Lab:** Assessment workstation setup & threat model mapping.

02 ADVANCED ENUMERATION

- **Active & Passive Recon:** OSINT correlation & domain profiling.
- **Service Deep-Dive:** Deep enumeration of SMB, SNMP, LDAP & RPC.
- **Attack Surface Mapping:** Banner grabbing & version analysis.
- **Lab:** Nmap scripting engine (NSE) & Enum4linux audits.

MODULES 3 & 4

03

NETWORK EXPLOITATION

- **Network Layer Attacks:** ARP spoofing, DHCPStarvation, MITM
- **Daemon Vulnerabilities:** Exploiting unpatched services
- **Vulnerability Scans:** Nessus Essentials auditing & CVE prioritization
- **Lab:** Metasploit auxiliary scanners & target verification

04

ENDPOINTS & DEFENSE EVASION

- **Payload Mechanics:** Reverse shells, staged vs. stageless execution
- **Detection Architecture:** Signatures, heuristics & behavioral EDR
- **Static/Dynamic Analysis:** Sandbox inspection
- **Lab:** Windows Defender policy tuning & AppLocker control

MODULES 5 & 6

05

WIRELESS

- **Wireless Standards:** WEP, WPA/WPA2-PSK & WPA3-Enterprise.
- **Handshake Analysis:** 4-way handshake capture & deauthentication.
- **Rogue Access Points:** Evil twin mechanics & hardening.
- **Lab:** Aircrack-ng capture analysis & EAP-TLS configuration.

06

MOBILE & IOT SECURITY

- **Android Security:** APK structure, permissions & storage flaws.
- **IoT Attack Surfaces:** Firmware analysis, UART/JTAG interfaces.
- **Protocol Flaws:** MQTT & CoAP review.
- **Lab:** MobSF static APK decompilation & Binwalk firmware extraction.

MODULE 7

MULTI-TARGET PENTEST

Execute an end-to-end authorized penetration test against an enterprise network simulator spanning diverse operating systems and services

CVSS v3.1 SCORING

Accurately calculate base, temporal, and environmental metrics for discovered vulnerabilities to reflect realistic business risk

AUDIT DELIVERABLES

Author professional, client-ready documentation containing an Executive Summary for leadership and Technical Remediation Roadmaps for engineers

Tools Ecosystem Overview

NETWORK & SCANNING

Nmap & Zenmap:

Comprehensive surface enumeration.

Metasploit: Framework validation.

Nessus: Vulnerability scanning.

ENDPOINT & WIRELESS

PEStudio & VirusTotal:

Static file analysis.

Aircrack-ng: Wireless packet auditing.

Sysinternals: Execution tracking.

MOBILE & IoT

MobSF(Mobile Security Framework): Automated mobile SAST.

Jadx: Java decompiler.

Binwalk: Firmware extraction.

Career Acceleration

AUDIT PORTFOLIO

Completed full-scope penetration test reports to present directly to technical recruiters.

PURPLE TEAM ADVANTAGE

Understanding both SOC detection telemetry and VAPT offensive paths makes you stand out in interviews.

MOCK INTERVIEWS

In-depth technical drills covering the 5 stages, network exploits, and remediation strategies.

PASCONIX CREDENTIAL

Verified Certificate of Completion in Advanced VAPT & Attack Lifecycle.

Career Pathways

Defensive Track (SOC L1)

ROLE

SOC Analyst / Incident Responder

CORE COMPETENCIES:

Log correlation, SIEM (Splunk/ELK), Threat Hunting, Alert Triaging, Sysmon telemetry & Wireshark packet audits

INDUSTRY ALIGNMENT:

CompTIA Security+, CySA+, Enterprise L1 SOC Operations.

Offensive Track (VAPT)

ROLE

Junior Pentester / Security Auditor

CORE COMPETENCIES:

Network exploitation, Wireless audits, Mobile SAST (MobSF), Metasploit validation & full vulnerability remediation roadmaps

INDUSTRY ALIGNMENT:

CEH Practical, eJPT, Junior Red Teamer roles.

Purple Team Specialist

ROLE

Senior Defense / Threat Emulation

CORE COMPETENCIES:

Dual mastery of offensive attack paths and defensive detection telemetry—closing enterprise security gaps end-to-end

INDUSTRY ALIGNMENT: Elite tier Demanded by consulting firms & Tier- 1 SOC's.

Ready to Master the Complete Cyber Lifecycle?

Advance from Defensive Monitoring to Offensive Penetration Testing at PasconX Academy.
